Built on an 80 Ha area in West Surabaya, Graha Natura works closely with the developers of Kebun Raya Purwodadi, Seameo Biotrop (South East Asia Regional Centre for Biological Tropical), and several other scientific institutes.

We are committed to build a healthier, waste-free residential area by building an Integrated Sewage Treatment Plant (ISTP), a system that centrally treats both liquid and solid household waste. Through the application of this technology, every unit in Graha Natura no longer requires a septic tank.

As the first step, we have developed four private clusters, apartment, school, club house, and commercial areas.
